THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE
OF THE UNITED STATES WITHIN THE MEANING OF THE ESPIONAGE ACT 50
U.S.C. 31 AND 32, AS AMENDED. ITS TRANSMISSION OR THE REVELATION
OF ITS CONTENTS IN ANY MANNER TO AN UNAUTHORIZED PERSON IS PRO-
HIBITED BY LAW. REPRODUCTION OF THIS FORM IS PROHIBITED.

THIS IS UNEVALUATED INFORMATION

25X1

1. The production from individual oil wells in the Matzen field generally
remains stable during the first two years of the well's life. Wells
in the Aderklaa field, however, although they have a higher gas
pressure than Matzen wells, have a life of only two to three months.
In order to maintain a constant production level in the Aderklaa field
new wells must be drilled constantly.

Oil is found at Aderklaa at a depth of approximately 1600 - 1800 meters,
and at Matzen at approximately 2400 - 2600 meters.
